General Information

Short summary

A Belgian SME providing IT tools to enable patient education, therapeutic compliance, patient reported outcomes and experiences is seeking partners to join the call "HORIZON-MISS-2022-CANCER-01-04 : Towards the creation of a European Cancer Patient Digital Centre" as part of the Horizon Europe Framework Programme (HORIZON).

Full description

A Belgian SME providing IT tools to enable patient education, therapeutic compliance, patient reported outcomes and experiences is seeking partners to join the call "HORIZON-MISS-2022-CANCER-01-04 : Towards the creation of a European Cancer Patient Digital Centre" as part of the Horizon Europe Framework Programme (HORIZON).

The company develops software solutions that enable better communication between chronic patients and caregivers by enforcing patient education, therapeutic compliance, and by providing AI-powered data analytics to care givers.

The goal of the mission on cancer is to improve the lives of more than 3 million people by 2030, through prevention, cure and for those affected by cancer including their families, to live longer and better. The objectives include: Understand; Prevent what is preventable; Optimise diagnostics and treatment; Support quality of life; Ensure equitable access in all aforementioned areas. The Mission on Cancer will address all cancers including poorly

understood cancers[[Includes refractory cancers or cancer subtypes, at any stage of the disease in any age group and part of society with a 5-year overall survival that is less than 50% from time of diagnosis.]] in men and women, cancers in children, adolescents/young adults and the elderly, cancers in socio-economically vulnerable people, living in either cities, rural or remote areas, across all Member States and Associated countries.

This would be through a health-in-all policies approach to public policies across sectors that systematically takes into account the health implications of decisions, seeks synergies, and avoids harmful health impacts in order to improve population health and health equity.
